Are partial close options available?

Vi Viphawee - 2026-03-04 - [Comments \(0\)](#) - [Trading Platforms & Tools](#)

Yes. You can partially close positions by modifying the trade volume in **MT4** or **MT5**.

□ How to partially close a position

On MT4 / MT5 (Desktop)

1. Open the **Terminal (MT4)** or **Toolbox (MT5)** window
2. Go to the **Trade** tab
3. Double-click on the open position you wish to modify
4. In the order window, change the **Volume** to the amount you want to close
 - Example: If your position is 1.00 lot and you enter 0.50 lot, you will close half
5. Click **Close**

The remaining portion of the trade will stay open.
