Do you support one-click trading?

Vi Viphawee - 2026-04-22 - [Comments \(0\)](#) - [Trading Platforms & Tools](#)

Yes. **One-Click Trading** is supported on both **MT4** and **MT5** platforms.

□ What is One-Click Trading?

One-Click Trading allows you to:

- Open positions instantly
- Execute trades directly from the chart
- Place market orders without additional confirmation windows

This feature is especially useful for fast-moving markets.

□ How to Enable One-Click Trading

On MT4 / MT5:

1. Go to **Tools** → **Options**
2. Select the **Trade** tab
3. Enable **One-Click Trading**
4. Accept the terms and confirm

You can also enable it directly from the chart panel.

□ *Trading with One-Click enabled may increase execution speed but reduces confirmation prompts. Please trade responsibly.*
