What are the risks?

Vi Viphawee - 2026-02-26 - [Comments \(0\)](#) - [Basics of Trading](#)

□ What are the risks of trading?

Trading financial markets involves risk. It is important to understand the key risks before participating.

□ Leverage Risk

Leverage can amplify both profits and losses. While it increases trading power, it also increases the potential for significant losses.

□ Market Volatility

Prices can move rapidly due to economic events, news releases, or market sentiment. Sudden price movements may result in unexpected losses.

□ Liquidity Risk

In certain market conditions, there may not be enough buyers or sellers. This can lead to slippage or difficulty executing trades at the desired price.

□ Emotional Decision-Making

Fear, greed, and overconfidence can lead to poor trading decisions and increased risk exposure.

□ Important Reminder

Understanding these risks and applying proper risk management strategies is essential for responsible trading.
