Which Method Should I Use to Withdraw?

Vi Viphawee - 2026-04-21 - [Comments \(0\)](#) - [Withdrawal](#)

□ Which withdrawal method should I use?

You must withdraw your funds using the **same payment method** used for your deposit. This is required in accordance with regulatory and anti-money laundering (AML) policies.

Available withdrawal methods may vary depending on your **country and regulatory entity**.

□ How can I check my available withdrawal methods?

To view the withdrawal methods available to you:

1. Log in to your **Client Area**
2. Go to **Funds > Withdraw Funds**

The system will display the methods eligible for your account.

□ Card Withdrawal Policy

If you deposited using a **debit or credit card**, your withdrawal will be processed back to the **same card as a refund**.

- Any amount exceeding the original deposited amount (card refund limit), or
- Any trading profits

may be withdrawn using other available withdrawal methods.

□ Need assistance?

If you have questions about available withdrawal methods, please contact our Support Team via:

- □ Live Chat
